IMM Coating Training Course

Corrosion Control by Protective Paints Course

Code: CCPP

HRDF claimable

This two-day course is aimed to provide course participants a firm foundation of the fundamentals of corrosion and how coating when properly applied will ensure efficient and cost-effective protection.

Reference standards (reference used shall refer to the latest published document):

- TBA

Who should apply

Managers, engineers, contractors, site supervisor, architects, and technical paints consultants

Objectives

- Understand what corrosion and protective coating are
- Accurately determine the extent of corrosion problems
- Evaluate various protective coatings
- Choose the most cost-effective coating system for optimum protection

Course topics

- Corrosion fundamentals
- Paint & protective coating
- Surface preparation
- Application of paints
- Coating failure, repair and maintenance

Course duration

2 days

IMM CPD points

Participants are entitled for 56 IMM CPD points (*7 activity hours x 2 days x 4 weightage factor*).

Pre-requisite(s)

No previous working experience required.

Certificate awarded

Certificate of attendance
